

cgroup_kill_write

cgroup_kill

__cgroup_kill

```
graph LR; A[cgroup_kill_write] --> B[cgroup_kill]; B --> C[__cgroup_kill];
```

The diagram illustrates a sequence of three kernel functions in a horizontal flow. The first function, 'cgroup_kill_write', is in a white box. A blue arrow points from it to the second function, 'cgroup_kill', also in a white box. Another blue arrow points from 'cgroup_kill' to the third function, '__cgroup_kill', which is in a gray box. This visualizes the call chain where 'cgroup_kill_write' invokes 'cgroup_kill', which in turn invokes the internal function '__cgroup_kill'.
