

`dma_get_seg_boundary
_nr_pages`

```
graph LR; A["dma_get_seg_boundary  
_nr_pages"] --> B["dma_get_seg_boundary"]
```

A diagram illustrating a mapping or transformation. On the left, a gray rectangular box contains the text `dma_get_seg_boundary` followed by `_nr_pages` on a new line. A blue arrow points from this box to a white rectangular box on the right. The white box contains the text `dma_get_seg_boundary`. This suggests that the multi-line identifier is being mapped to or simplified into the single-line identifier.

`dma_get_seg_boundary`
