

get_track

```
graph LR; A[get_track] --> B[get_info_end]; B --> C[freeptr_outside_object];
```

A flowchart illustrating a sequence of three functions. The first function, 'get_track', is highlighted with a gray background. A blue arrow points from 'get_track' to the second function, 'get_info_end', which has a white background. Another blue arrow points from 'get_info_end' to the third function, 'freeptr_outside_object', also with a white background. All three functions are enclosed in rectangular boxes with black borders.

get_info_end
